

## Guidelines for the Proceeding Manuscript

### 1. Introduction

- brief background info about the province/study area (ex. site description, extent, location, known for, number of barangays); awards/recognitions received
- importance of mangroves to the community

### 2. Status of mangroves in the province/study area (cite reference; maybe Socio-economic profile)

- extent in hectares - natural, planted, restored (old stand, secondary growth, plantation); mangroves species present in the area
- maps (if available, before and after management or after disturbance such as typhoons)
- number of restoration/rehabilitation projects and area (in hectares)
- initiatives on mangrove conservation other than mangrove planting
- location and size/extent of degraded mangroves
- perceived threats to mangrove ecosystem

### 3. Mangrove Protection and Management

- Rehabilitation programs (extent in hectares; process); funding source; year started/ended
- Monitoring and Evaluation (growth and survival rate; sampling methods and reference)
- Impacts of mangrove rehabilitation in terms of ecosystem and socio-economic contributions (e.g. food, income)

### 4. Summary and Recommendations

### 5. References

- Each province/municipality is allotted with **6 pages** for their State of the Mangrove Report (including figures, graphs and tables). If the space allotted is not enough, it can be included in the Appendix portion
- As agreed during the synthesis reporting, the deadline for submission of report is on **April 6, 2018 (Friday)**. You may send the report through our email, [ssalmo@ateneo.edu](mailto:ssalmo@ateneo.edu); [cruzmarge2003@yahoo.com](mailto:cruzmarge2003@yahoo.com); [eunicegianan@yahoo.com](mailto:eunicegianan@yahoo.com). The team **will return the report after review after a week** for final approval from your office. The **target date of release** of the proceedings is between **June to July 2018**.
